

Transforming Renewable Energy Demands into Accessible Solutions

Whether you're an industrial, commercial or smaller business, we can help you meet your sustainability targets with flexible options.

RPD Energy facilitates the sourcing, contracting and delivery of renewable energy for U.S. companies.

We source energy directly from local wind, solar, and hydro assets, customizing contract volume and length to meet your needs.

Choose a trusted partner in the energy value chain that will create a customized solution to meet your sustainability goals.

Award-winning innovation in renewable energy solutions

Meet Your Energy Sustainability Goals with RPD Energy

- We source renewable energy and concurrent RECs from a local generator to deliver sustainability benefits using a standard retail energy contract
- Our comprehensive and flexible solutions meet all environmental reporting agency protocols

Maximize your Energy Budget with Cost-Effective Renewable Power

- With RPD's solutions, you can buy local, physical renewable energy without having to sign up for an entire wind or solar farm
- Shorter, streamlined contracts with more flexibility and less risk than traditional long-term PPAs

Decrease your Footprint with 24/7 CFE (Carbon-Free Electricity)

- To maximize your sustainability impact, we can also match your hourly energy demand with renewable generation. We use cutting edge forecasting and analytics – and strong supply relationships to construct an optimized generation profile from multiple renewable energy sources that will track your forecasted load.

Achieve your Energy Sustainability Goals on Budget

- From simple physical renewable power to complex hourly load matching, our extensive knowledge of the renewable energy value chain delivers your solution cost-effectively to meet your energy sustainability goals
